

# Water ATM

Automatic Dispensing Unit (ADU)  
with inbuilt card recharge facility

- The Water ATM allows a customer with a bonafide charge card to get purified drinking water automatically 24 hours a day without the presence of an operator.
- Fool proof system to eliminate theft of water and money collected.
- Flexible recharge options to consumers. Cards with low or no balance can be recharged through a password on the Water ATM itself.
- The Water ATM will display and transmit an alert if there is low tank level, low voltage or ATM malfunction.
- Through RS485 port all information can be transmitted to a remote PC/Tablet/Smart Phone.

## Prepaid Water Cards

- Cards issued to customer are uniquely identifiable and they are tamper proof.
- Card stores balance in the form of litres.
- Balance on card will be updated after every valid use at the OEM's ADU
- Available in digitalized colours

## *(Optional)*
